

# Aftermarket

## An add-on water from air product for RVs, Caravans, Large Vehicles, Yachts and Public Transportation

Watergen's Aftermarket solution is the answer to all your water needs when you are travelling, and you don't trust the quality of the drinking water. It allows you to remain off the grid for even longer, by providing a source of good, clean, safe drinking water when one isn't available.

As the first onboard Atmospheric Water Generator (AWG), Watergen's Aftermarket solution provides a steady supply of **up to 40 liters daily** of hot or cold fresh, safe drinking water from air, available to drink at all times.

The inbuilt GENius patent allows water production in a wide range of climate conditions: from 15°C and 20% humidity.

The Aftermarket solution cuts out the need to stop at the store to purchase plastic bottles for your trip, or from lugging giant plastic jugs of water from home - for a cleaner, greener and more convenient drinking water solution. It works on 12-volt system that can be supplied directly from a vehicle or watercraft's 12-volt battery or any other electrical source, comprises two easily-installed units. The first generates the water from humidity in the air; while the second unit has been designed for purification, storage, and dispensing purposes.

The aerodynamic AWG is aesthetically designed to fit various applications, for a sleek and seamless solution for all your water provision needs while on the go.

## Aftermarket Advantages

-  **Water production and water delivery on the go**
-  **Provides up to 40 liters of fresh, safe drinking water from air daily**
-  **Easy installation  
Works on 12V power source**
-  **Off-the-grid solution**
-  **Can be installed in a range of mobility devices, RVs, caravans, yachts, buses and large vehicles**
-  **Sustainable solution, reduces plastic waste and carbon footprint**
-  **Water production starts from 15°C and 20% humidity**
-  **Complies with international drinking water safety standards**

## Specifications

<b>Water generation capacity</b>	Up to 40 liters/day
<b>Water dispensing</b>	Ambient
<b>Power</b>	12V
<b>Power consumption</b>	480W
<b>Operational temperature</b>	≥15°C
<b>Operational humidity rate</b>	≥20%
<b>Air filtration</b>	Sub-micron barrier filter that eliminates <2.5 particulate matter
<b>Water purification</b>	Multi-step filtration cascade combined with high-end treatment technologies followed by a germicidal UV lamp. Vital minerals balance the water pH to achieve high purification and tasty drinking water.
<b>Noise level</b>	≤ 52 dBA

## Applications

Trucks

Yachts

Trains

Camping Overland

## About Watergen

Watergen has devoted its innovative technology towards solving the world's water crisis under the leadership of its president, Dr. Michael Mirilashvili. Watergen provides a game-changing water from air solution based on its proprietary patented GENius technology that uses humidity in the air to create clean and fresh drinking water for people everywhere. The company offers a range of Atmospheric Water Generators (AWG) for various applications; the home-office scale GENNY that can produce up to 22 liters of drinking water per day, the medium-scale GEN-M that produces up to 800 liters of drinking water per day and the industrial, large-scale generators that can make as many as 6,000 liters of drinking water per day. Watergen's AWGs are installed in more than 60 countries around the world.
